IA:  
*findable and understandable*

KT:

*findable, understandable, and utilized*

the know-do gap

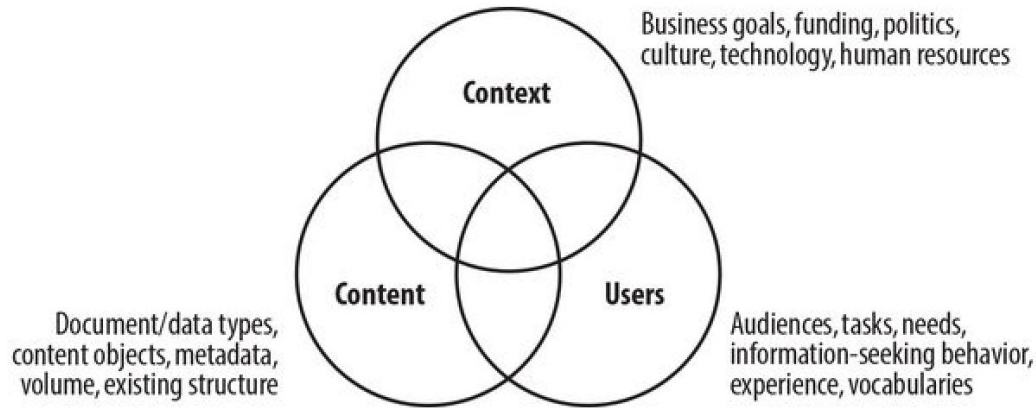

from *knowledge* to *action*

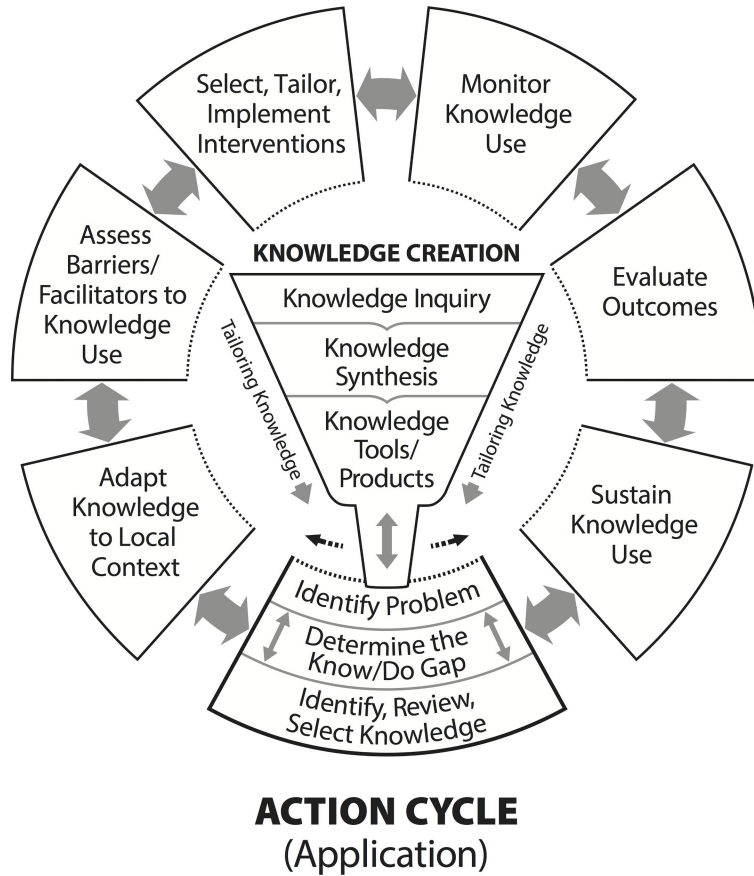

*Figure 11-1. The process of information architecture development*

*Figure 11-2. A balanced approach to research*

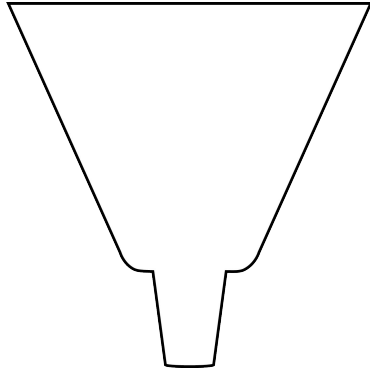

At every stage:

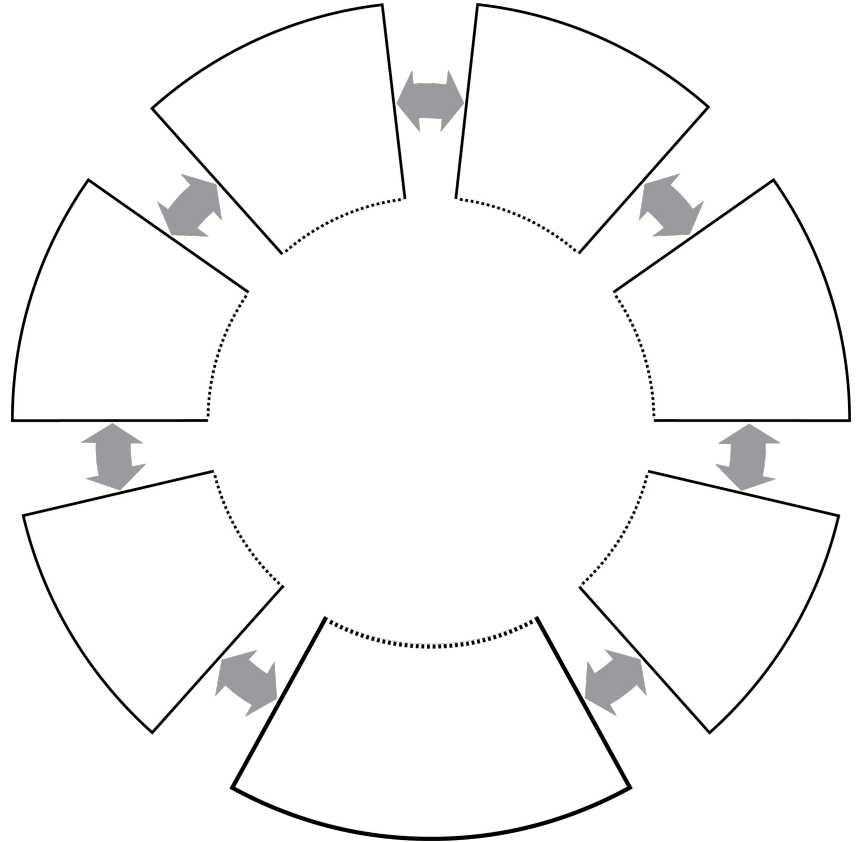

- users
- ethics
- resources

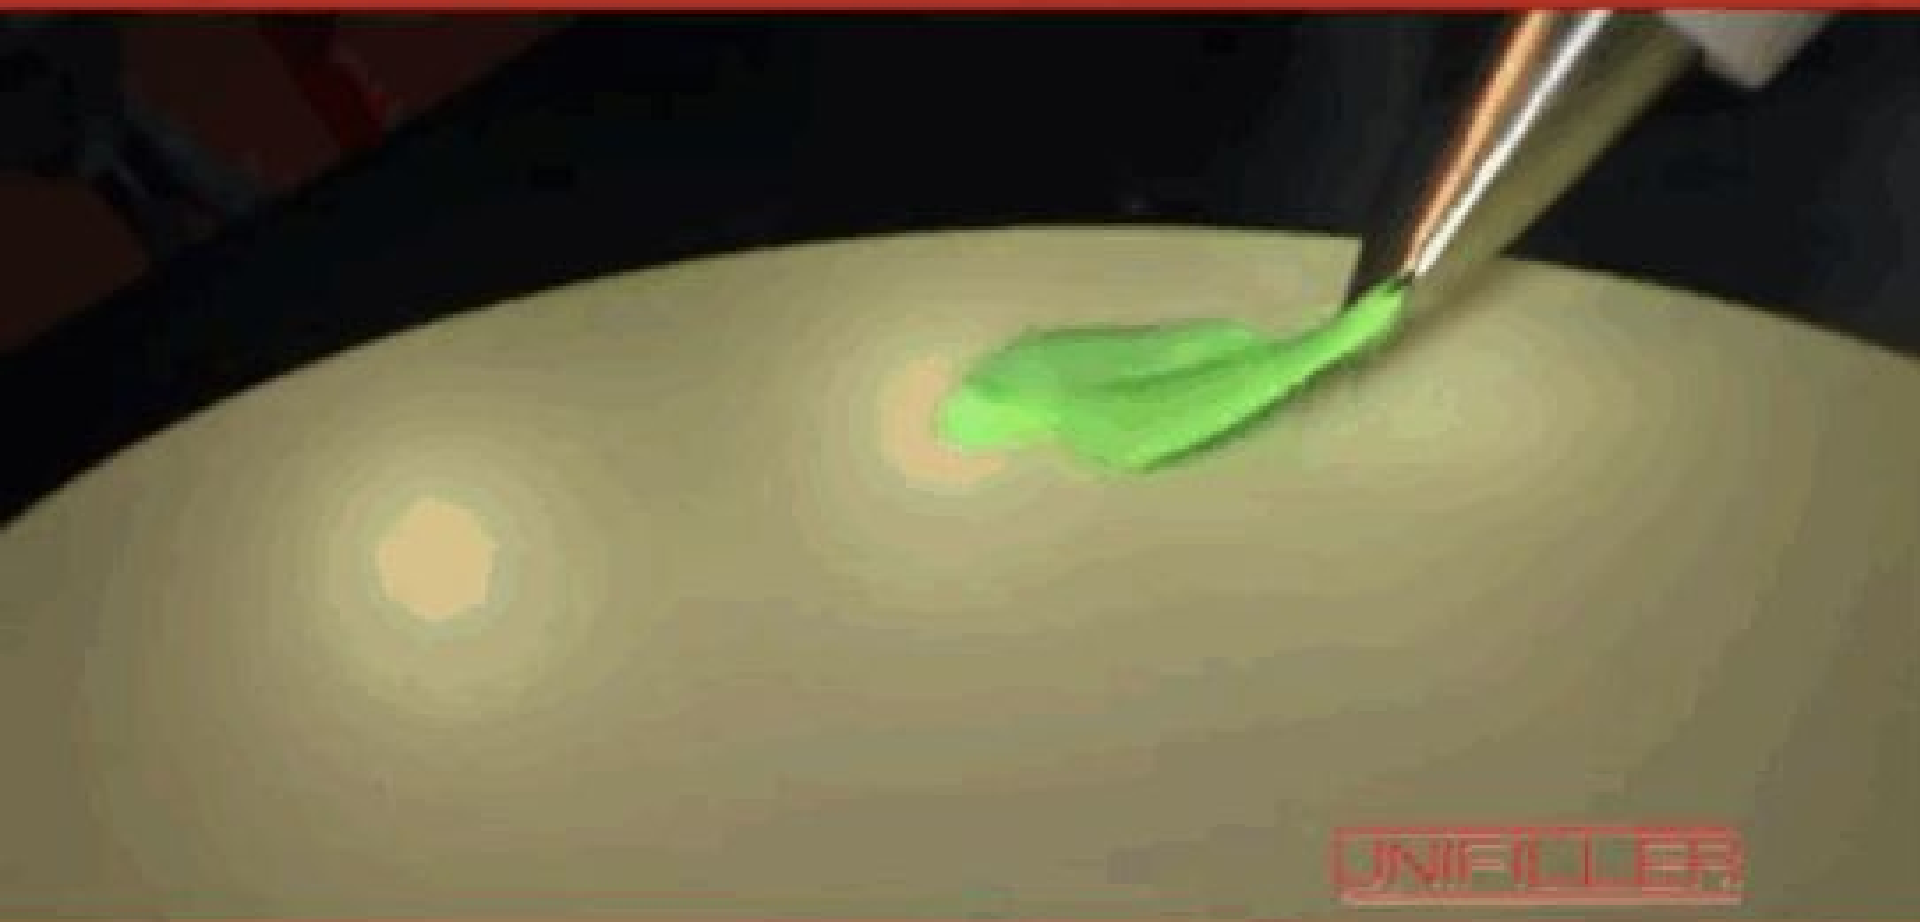

Straus, Tetroe, Graham eds. 2013. *Knowledge Translation in Health Care: Moving from Evidence to Practice*, Second edition. Wiley Blackwell.

knowledge funnel

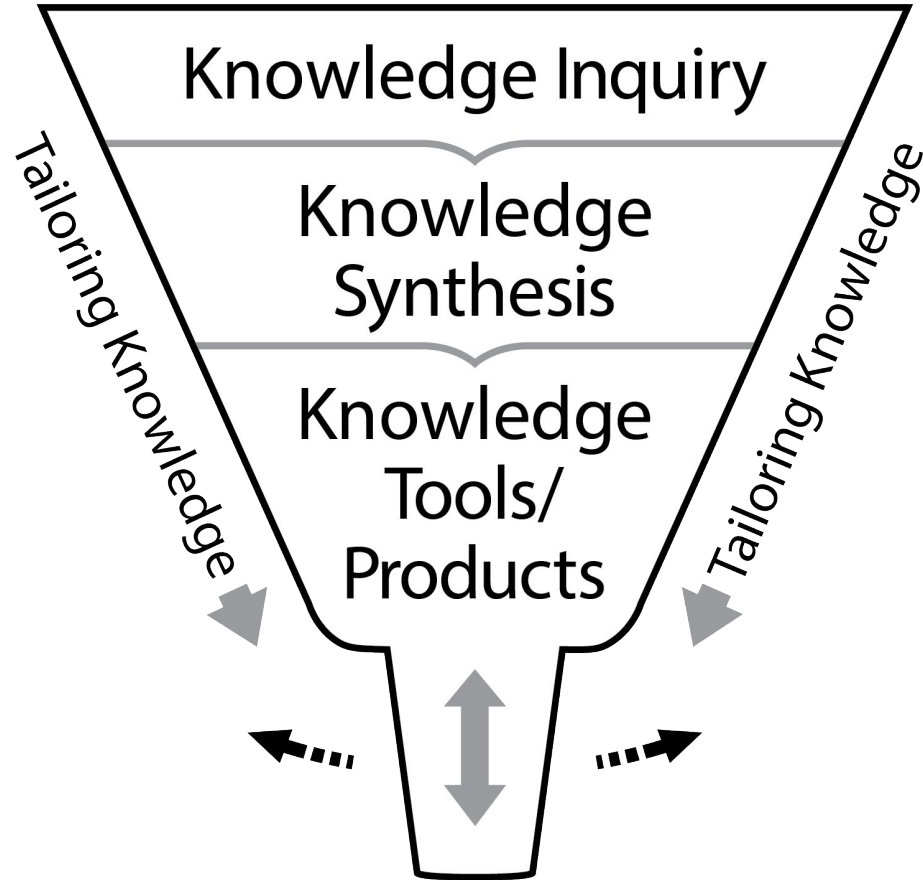

action cycle

UNIFIL

# KNOWLEDGE CREATION

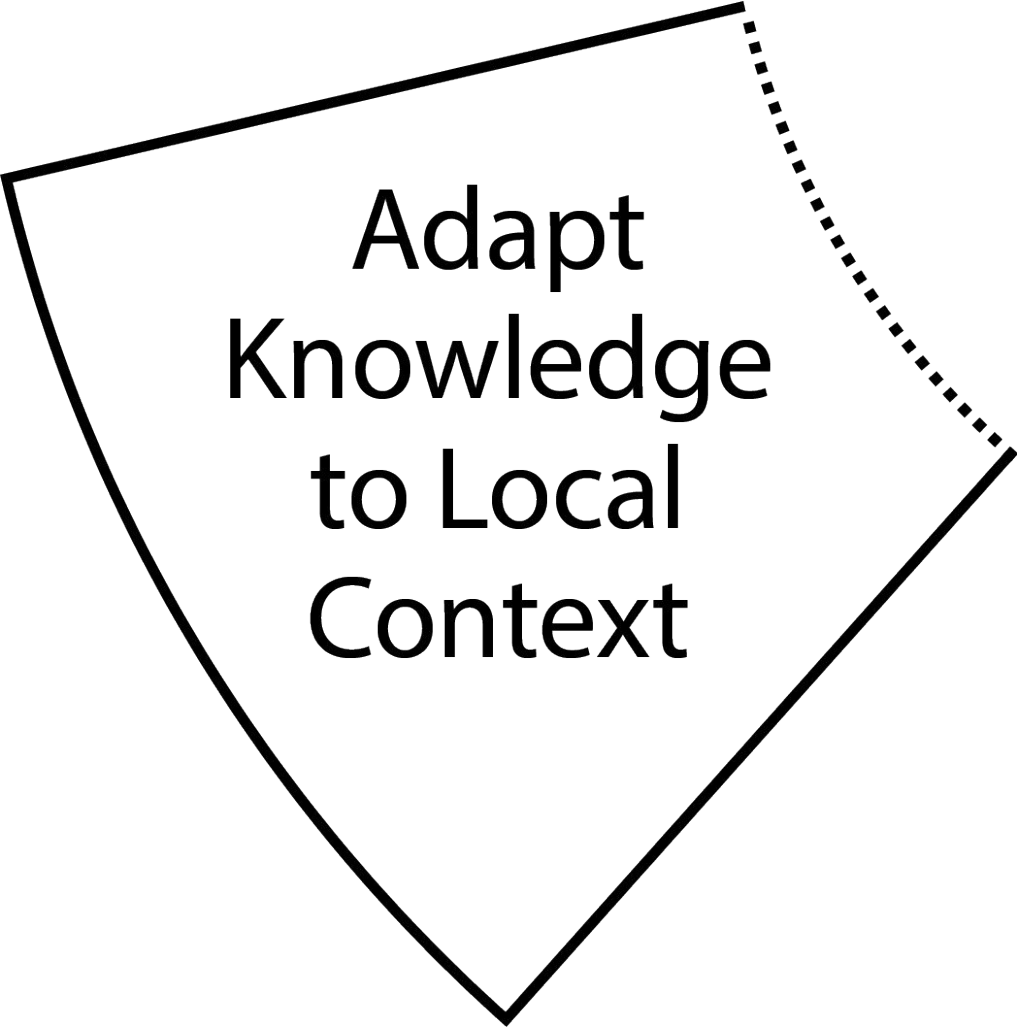

Identify Problem

The diagram is a funnel shape, wider at the top and narrower at the bottom. It is divided into three horizontal sections by two curved lines. The top section is the widest, the middle section is of medium width, and the bottom section is the narrowest. The top boundary of the funnel is a dashed line, while the other boundaries are solid black lines. The text is written in a black, sans-serif font and is centered within each section, following the curve of the funnel.

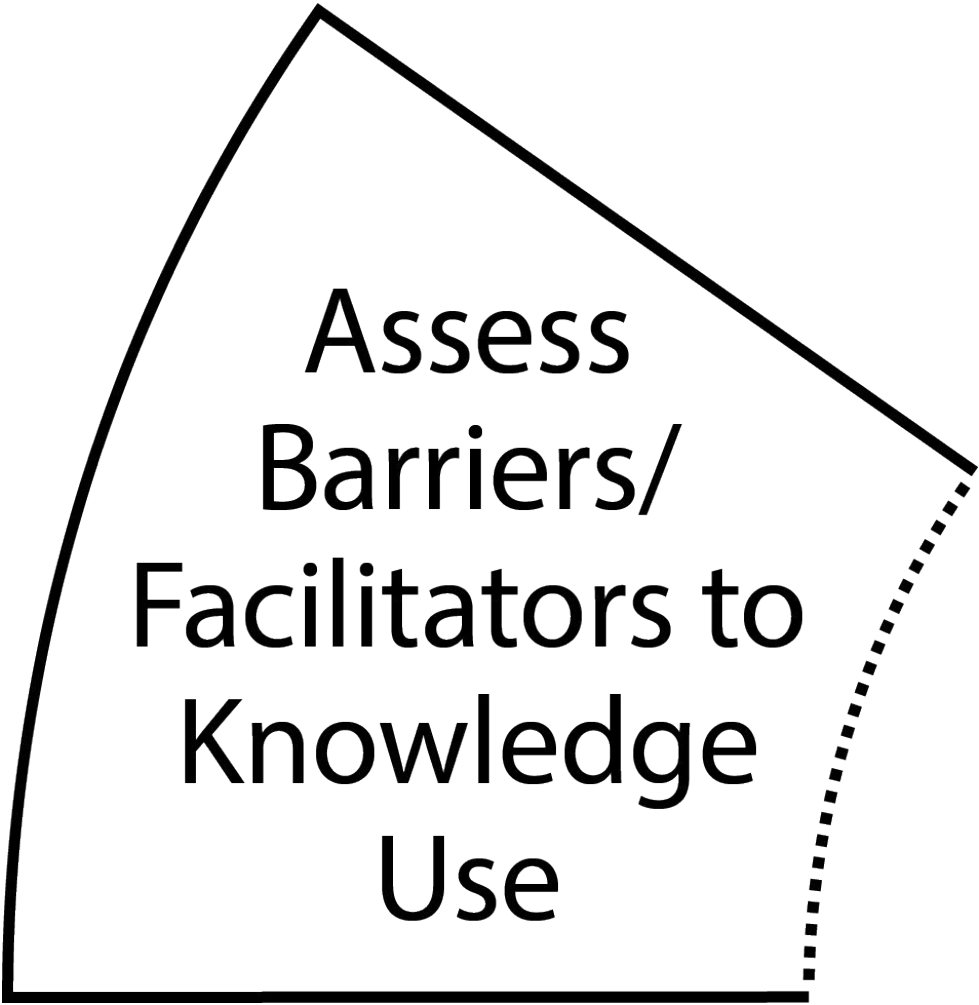

Determine the  
Know/Do Gap

Identify, Review,  
Select Knowledge

Adapt  
Knowledge  
to Local  
Context

Assess  
Barriers/  
Facilitators to  
Knowledge  
Use

Select, Tailor,  
Implement  
Interventions

Select, Tailor,  
Implement  
Interventions

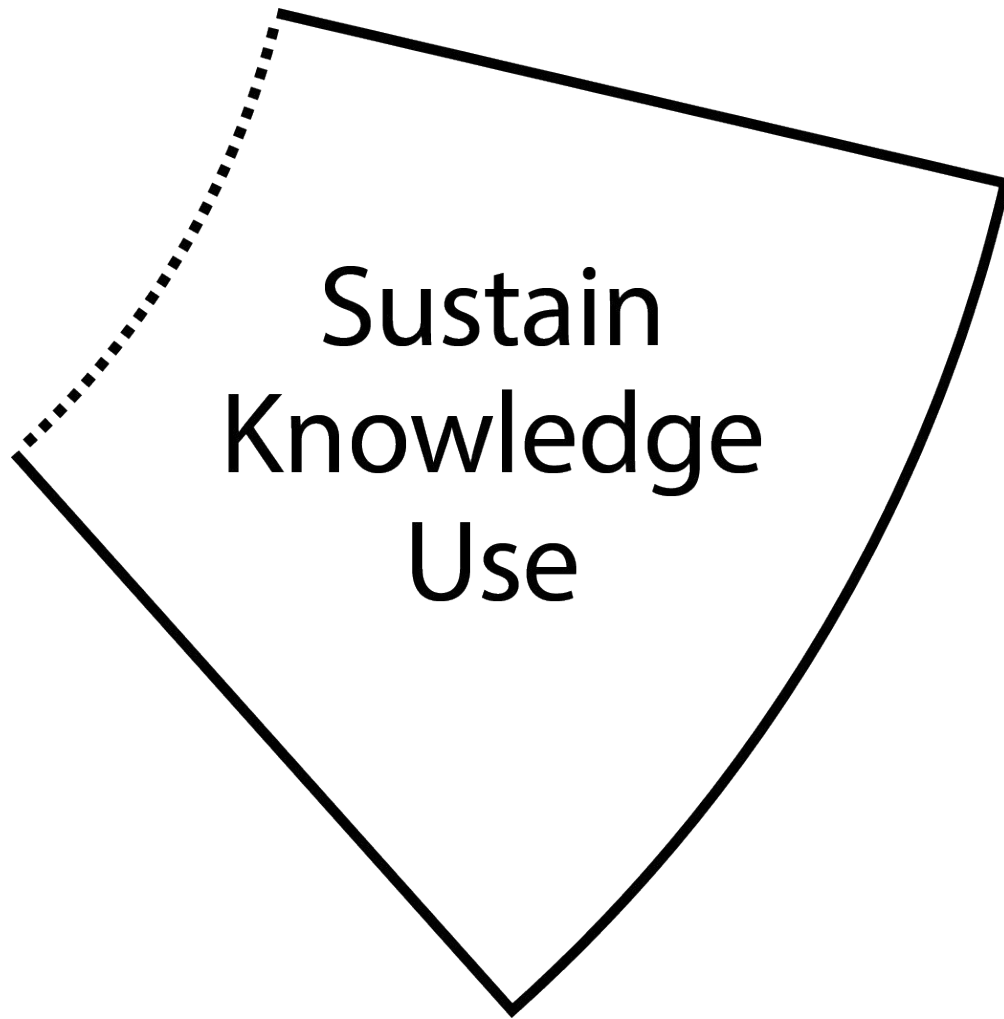

Select, Tailor,  
Implement  
Interventions

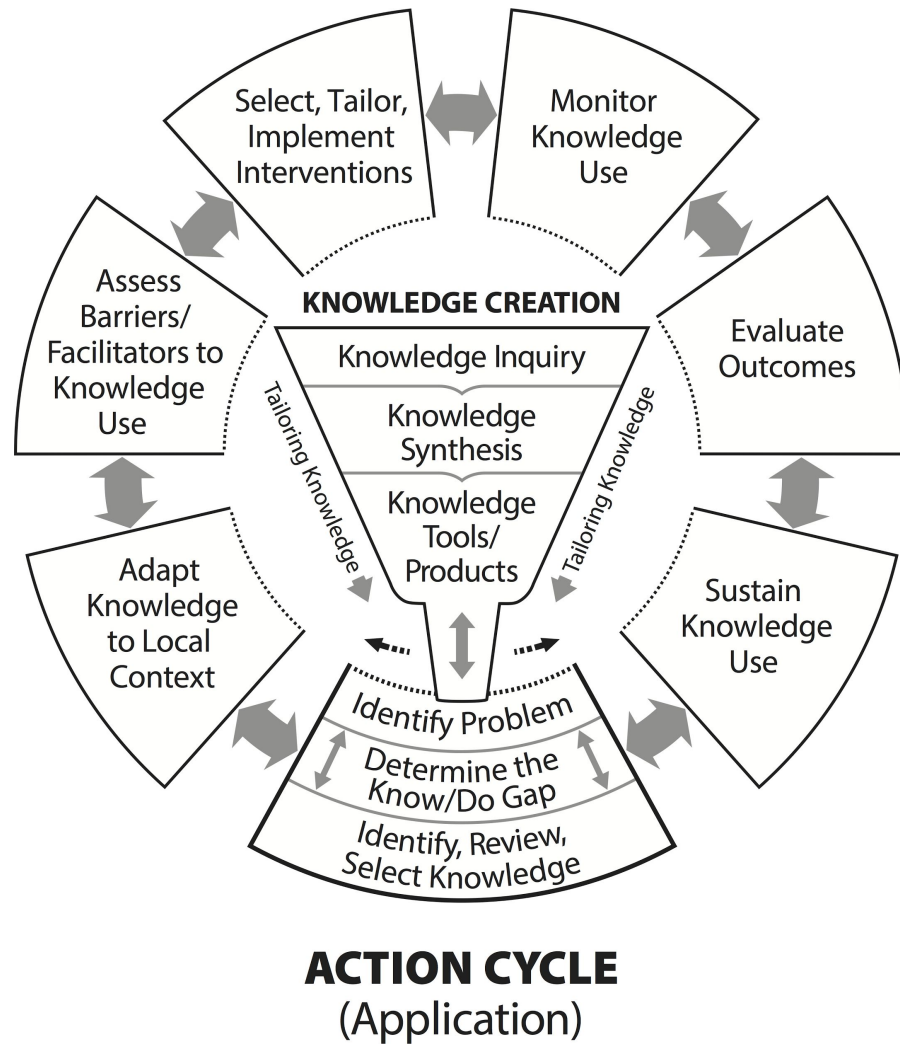

Monitor  
Knowledge  
Use

A hand-drawn style outline of a house. The roof is a simple line. The right side is a curved line. The bottom is a horizontal line. The left side is a dotted line. The text "Evaluate Outcomes" is centered inside the house.

Evaluate  
Outcomes

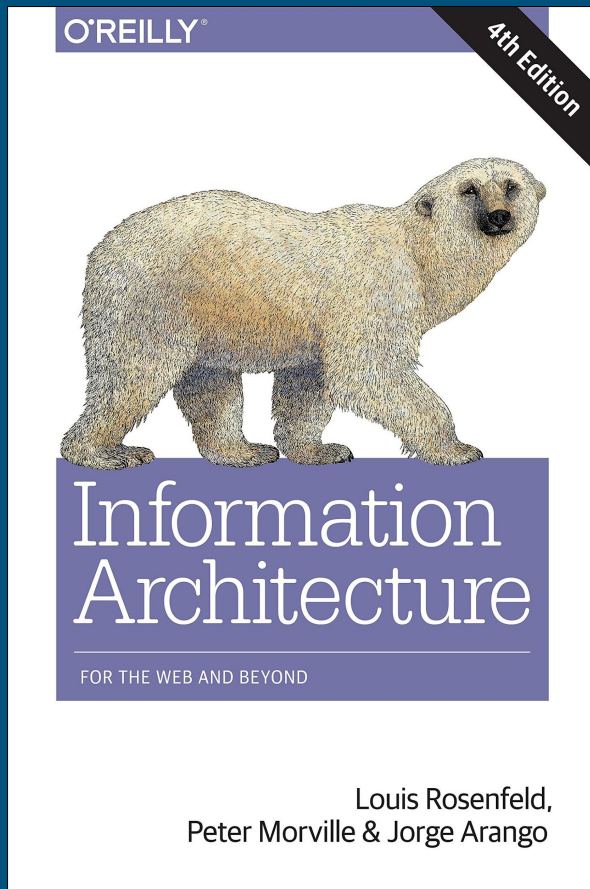

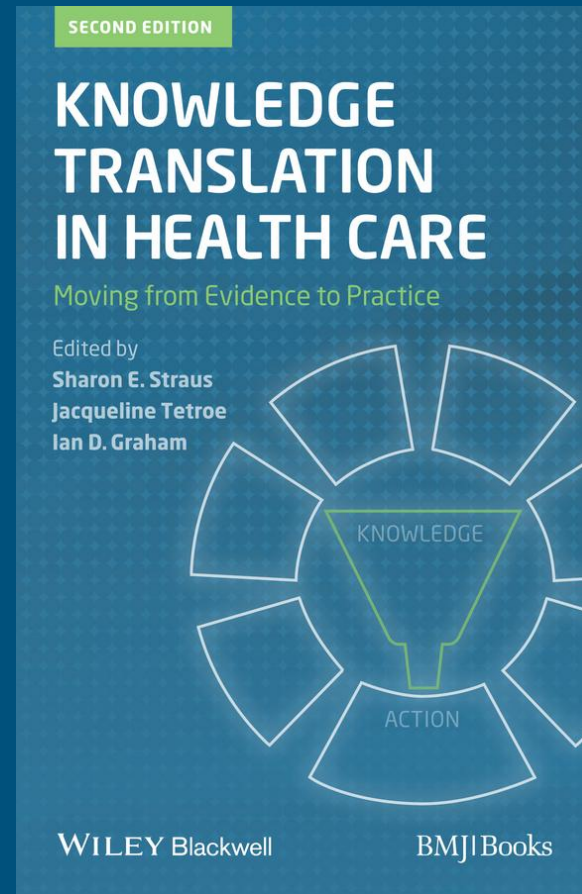

IA is free verse

KT is a haiku

...but it's all poetry
